

## **Background, Methodology**

The Department of Education and the School Construction Authority are required to submit a semi-annual report to the Board of Education and the School Construction Authority Council concerning air conditioning status. The semi-annual reporting periods have been updated as follows: The first report shall be submitted no later than January 15, 2019 and shall cover the period beginning July 1, 2018 and ending December 31, 2018. The second report shall be submitted no later than July 15, 2019 and shall cover the period beginning January 1, 2019 and ending June 30, 2019. This report is straddling a time period with the previous annual report, and therefore covers a period beginning April 1, 2018 and ending December 31, 2018.

This report provides information detailing which schools have air conditioning installed, which schools have air conditioning installed that are not currently functioning, and which schools have had air conditioning installed during the reporting period. All reporting is by building. A school-by-school breakdown has been provided.

This report consists of two tabs:

### **(1) A/C Status**

The A/C data in this semi-annual report originates from the 2017-2018 Principal Annual Space Survey, which was updated based upon in-person site visits at buildings. Sites that did not meet the criteria for the A/C MIP were removed from the dataset (Pre-K Buildings, New Buildings, Gyms, TCUs, Correction Facilities, Administrative Buildings, Expired leases and Demolished Buildings). Room statuses are shown in aggregate, on a building-by-building basis. The report does not differentiate the A/C status among schools which are located in the same building.

The DOE and SCA are showing categories of rooms in the report that reasonably reflect the intention of the announcement in April 2017 to provide A/C in all NYC public school classrooms. Phasing and cost information for all rooms currently considered to be "instructional". "Instructional" rooms include regular and special education classrooms, as certain support rooms. They do not include Physical Education/Public Assembly ("PE/PA") rooms, which are shown separately from the "instructional" counts. This report does not include other categories of rooms, such as administrative spaces or facility operations spaces.

Summer school sites have been initially prioritized for installations, and schools with high utilizations are being prioritized next. The DOE and SCA continue to work closely together to assess school needs based on ability to install A/C in buildings have been scoped for A/C status, so the number of rooms requiring new or replacement A/C is changing. Additionally, as the DOE and SCA work as swiftly as possible to install new and replacement air conditioning, the counts of rooms that require A/C are frequently changing.

Costs for direct replacements have been estimated at a cost of \$2,125 for rooms in the FY19 phase, rising to \$2,500 annually. The estimated cost assumes one unit per room. Some rooms will require more than one unit of A/C. Electrical upgrades is subject to scope. "In Progress" means construction work related to electrical upgrades is ongoing.

**(2) Building\_School Crosswalk**

Lists all schools that are housed in each building.
